

## Instructions for adding a swragentpro.com Contact Sync account - iPhone/iPad

Adding a Contact Sync account will allow you to see your swragentpro.com contacts and keep them updated on your iPhone/iPad. Changes to this group of contacts made in either swragentpro.com or on your iPhone/iPad will be synced to the other. Your SWRAgentpro contacts are automatically set to sync once you have a device (iPhone/iPad) set up.

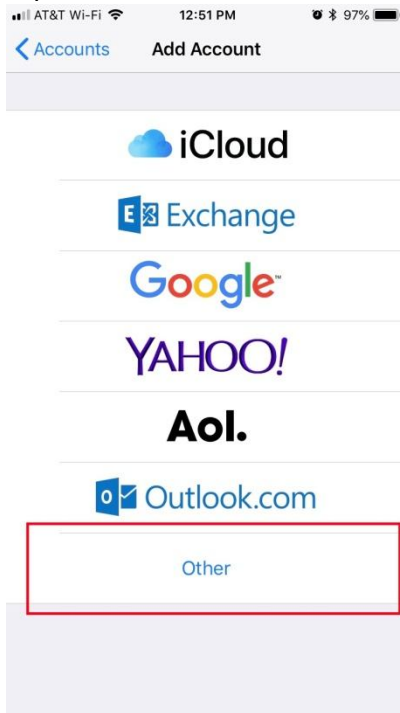

1. From your Home Screen, tap **Settings**
2. Tap **Passwords & Accounts** (on older iPads this will be found under **Mail, Contacts & Calendars**)

3. Tap **Add Account**

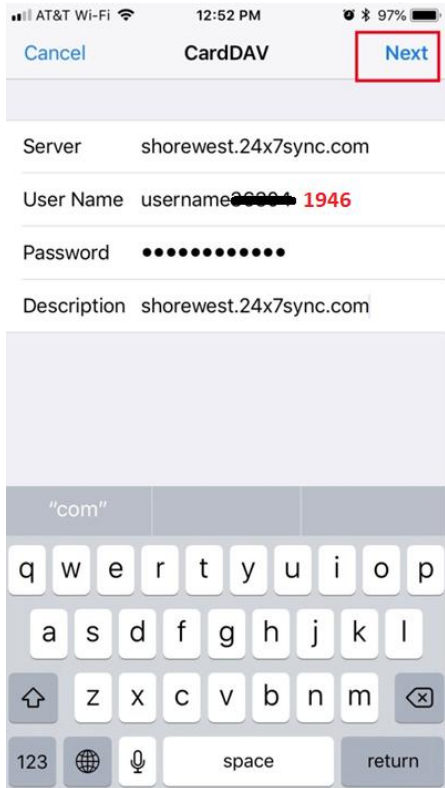

#### 4. Tap **Other**

#### 5. Tap **Add CardDAV Account**

6. For server, enter **shorewest.24x7sync.com** – the **user name and password will be your swragentpro.com login information**. Once entered, tap **Next**

7. The account will attempt to verify – if you receive no message about an incorrect user name and/or password or server name, the account should be setup once verified. Please allow 5-10 minutes for the phone to sync all of the contacts.
